VOTING SYSTEM CERTIFICATION TESTING & ELECTION SUPPORT SERVICES

During elections, it's important to ensure that your voting systems and processes are functioning correctly. Voting systems lose accuracy and proper functionality as they get older, creating a number of issues, including discrepancies in the tallying of votes. Using an outside VSTL (Voting System

Test Laboratory) to identify and remediate any issues with your systems will limit risk and help to extend the life of your voting system.

Testing these systems to ensure quality performance is the only way to build and maintain voter confidence; however, this can be difficult without testing or compliance standards in place. SLI Compliance has a team of professionals to help ease election-related worries with our suite of voting system testing services including requirements development for certification testing.

**KEEP YOUR SYSTEMS
- and your business -
COMPLIANT AND SECURE**

VOTING SYSTEM CERTIFICATION TESTING

- Document Review
- Source Code Review
- Functional Testing
- Security Testing
- Electrical & Environmental Testing
- Electronic Poll Book Testing

ELECTION SUPPORT SERVICES

- eLearning for Elections
- Election Procedure Assessment/Audit
- Configuration Verification
- Pre/Post-Election Forensic Analysis and Audit
- Voting System Standards Development

WHY SLI COMPLIANCE?

SLI Compliance has been at the forefront of voting system testing for more than 15 years. Our extensive knowledge of the voting and elections industry includes practical application of its promoted standards and best practices and provides an end to end understanding of the election process, including the use and maintenance of electronic voter registration systems.

- ▶ SLI Compliance has been an Independent Test Authority (ITA) since the National Association of State Election Directors (NASSED) first established an ITA certification program in 2001.
- ▶ SLI Compliance is accredited under the National Voluntary Laboratory Accreditation Program (NVLAP) of the National Institute of Standards and Technology (NIST) (NVLAP Lab Code 200733-0: TESTING).
- ▶ SLI Compliance is also accredited by the U.S. Election Assistance Commission (EAC) as a Voting System Test Laboratory (VSTL).
- ▶ SLI Compliance VSTL staff maintain security and internationally recognized software testing certifications.

Our extensive knowledge of election processes, software security practices, and voting system industry standards assures your test engagement receives the high-quality testing rigor required to meet today's certification standards.
