Certification on CHPL / ONC-ACB provides maintenance

Testing and Certification ensures eligible professionals, practices and hospitals that the Health IT technology they're considering has the necessary capabilities to satisfy the ONC Health IT Program criteria and CMS incentive program goals and objectives.

WHY SLI COMPLIANCE?

➤ *Experience*. We've been working as an ONC-ATL on the Health IT Certification Program since 2010.

➤ *Customer Service*. We understand the Health IT Certification program can be confusing, which is why our team of experts is here to walk you through the process from pre-testing to certification. Outstanding service and quality commitment are our top priorities, and we deliver just that to each and every one of our clients.

➤ *Integrity.* Our culture is built on transparency, ownership and accountability, we are committed to maintaining independence, impartiality and holding ourselves to the highest of standards.

(ONC-ATL) TESTING SERVICES

SLI Compliance is an ONC Authorized Testing Laboratory (ATL), fully accredited to test all approved 2015 Edition criteria within the ONC-Health IT Certification Program - ensuring a product meets the baseline requirements. Our ONC-ATL services are provided at the SLI Compliance Lab using a remote testing platform to conduct interactive testing, self-attestation validation, and/or document review dependent on the criteria selected in the product scope.

Our ONC-ATL process includes ATL Pre-Test Preparation; ATL Testing Support; Visual Verification and Offline Verification Testing; Tool Verification; and Retesting if required.

(ONC-ACB) CERTIFICATION SERVICES

Our team conducts a review of the ATL submitted test results and, upon successful completion, issues official ONC Health IT Certification for the client system under test (SUT). SLI shall conduct certification as an ONC Authorized Certification Body against the approved 2015 Edition ONC criteria. Certification is granted based on the requirements of ISO/IEC 17065:2012 and the rules and regulations of the ONC Health IT Certification Program.

PRE-CERTIFICATION TESTING SERVICES

Not ready for the ATL-ACB program? SLI Compliance offers Pre-certification testing services for the 2015 Edition ONC criteria, helping vendors prepare for testing and certification. Our team follows the same process as the official testing for an ONC ATL-ACB project but allows the vendor to engage the test team during testing.

Key benefits of pre-certification testing:

- Assist vendors in identifying their system scope and define process starting point.

- An opportunity for the vendor to decide which criteria need review and testing for their system/product

- Vendor has the opportunity to ask questions during testing and receives real-time feedback on issues and risks.

- Provides the assurance of third-party verification and validation of the product/system to ensure it meets the ONC Health IT Program requirements.
